

SAFE / SOLID / RELIABLE

Our storm shelters and safe-rooms can be the difference between life and death. We have the ability to configure the shelters to any size or shape, including the ability to expand the unit after installation. In addition, our units can be moved and relocated.

All of our shelters are certified to provide protection from devastating EF-5 tornadoes. Our standard storm shelters made from 1/4-inch steel plate provide protection from handgun and shotgun rounds. These are the most durable products on the market to provide protection for your family or business.
